

A diagram illustrating a relationship between a rounding mode and a Boost library template. At the top, a white rectangular box with a black border contains the word "Rounding". A blue arrow originates from the bottom center of this box and points downwards to the top center of a larger gray rectangular box with a black border. Additionally, a blue curved arrow starts from the right side of the "Rounding" box and loops back to its right side, indicating a self-referencing relationship.

Rounding

`boost::numeric::interval  
_lib::rounded_arith_exact  
< T, Rounding >`
