

paradiseo::smp::Abstract
Topology

```
graph BT; A[paradiseo::smp::CustomStochasticTopology] --> B[paradiseo::smp::AbstractTopology]
```

The diagram illustrates a class hierarchy. At the bottom is a gray-shaded box labeled 'paradiseo::smp::CustomStochasticTopology'. A blue arrow points vertically upwards from this box to a white box at the top labeled 'paradiseo::smp::AbstractTopology'. This indicates that CustomStochasticTopology inherits from or implements AbstractTopology.
