

A diagram illustrating a relationship between a rounding mode and a Boost library template. At the top, a white rectangular box with a black border contains the word "Rounding". A blue arrow points from the bottom of this box to the bottom of a larger gray rectangular box below it. A blue curved arrow also originates from the right side of the "Rounding" box and points back to its top-right corner, indicating a self-referencing relationship.

Rounding

`boost::numeric::interval
_lib::rounded_transc_std
< T, Rounding >`
